

MIRACULOUS DISAPPEARANCE OF TB GERMS!

My name is Anusuya and a young adult girl. I live in Chennai, with my parents. For the past two months, I have been suffering from cough, cold, and fever and the medicines taken by me did not yield any results. I took it easy and did not think that it was something serious. However, the results of the

blood test done in a hospital revealed that I was affected by TB germs. We all were sad and did not know what to do. At that time, the missionaries of the COME Ministries came to our home and I shared my sorrow with them. They consoled me by saying that TB is very much curable now and prayed for me. They pleaded with Jesus to bless me with a miraculous healing. They also cited many examples from the neighbourhood wherein prayer to Jesus had brought miraculous healing. They also taught me how to pray.

I obeyed them and began to pray regularly before taking food and medicines. Jesus heard my prayer and showed sympathy for me. The cough, cold, and fever came to an end and the doctors who tested me were puzzled as there was no symptom of TB germs in my blood. I thank Jesus who did a miracle in my life and saved me from such a dangerous disease. He is the true God and I will worship Him alone from now on.
